**DISPARLON<sup>®</sup> 230EF**  
(Surface control agent)

**DISPARLON 230EF** is a silicone free, non-ionic high molecular weight surface control agent supplied as solution with n-butyl acetate. This product acts not only as anti-flooding/anti-floating agent but also as defoaming/leveling agent.

**ADVANTAGES**

- Act as anti-floating, anti-silking and anti-flooding agent when adsorbed on the pigment surface and/or dispersed throughout the applied film.
- Improves leveling and eliminates pinholes and entrapped air.
- Has defoaming properties and aids in the removal of entrapped air.
- Improves wetting of the substrate without affecting recoatability.

**APPLICATIONS**

**DISPARLON 230EF** can be used for Oil-based paints, synthetic resin paints, inks and other solvent based paints and coatings. This additive is especially recommended as an anti-floating agent for baking enamels and lacquers and as a Defoamer for Epoxy, Urethane and Chlorinated rubber systems.

**INCORPORATION**

Additive level : 0.2 ~ 1.0 % by weight

Method : Post addition on high speed dissolver is recommended.

**TYPICAL PROPERTIES**

Appearance .....	Colorless to light yellow liquid
Non-volatile matter.....	40 % by wt.
Density .....	0.92 g/cm <sup>3</sup>
Solvent .....	n-Butyl acetate
